Revision history for swfdr repository

Nathan (Nat) Goodman

October 16, 2017

Release 1.01 2018-09-03

Added words on posting comments using GitHub Issue Tracker

Release 1.00 2017-10-16

Revise documents per comments of external readers

- As suggested by Daniel Lakens, I added Sholom Wacholder et al's 2004 paper "Assessing the Probability That a Positive Report is False: An Approach for Molecular Epidemiology Studies" as the earliest work on the subject instead of saying that John Ioannidis's 2004 paper, "Why most published research findings are false" started it all.
- Inspired by Will Gervais's comments, I changed "case #3" in the discussion to explain that this sometimes improves the hypothesis and sometimes not.
- As suggested by Will Gervais, I added Paul Smaldino and Richard McElreath's paper "The natural selection of bad science" to my brief discussion of "Publish or Perish".

Changes to support public release

- Update dates in all documents
- Add 'stable' version of swfdr document as crude workaround for lack of versioning in GitHub Pages and change README accordingly

Release 0.90 2017-10-04

First version. Ready for feedback from external readers.
